> Step Five - Get Data

Current Selections [\[hide\]](#)

Selected Tables: [1 \[view\]](#)

Dataset: 1990 (Census of Population and Housing)
Geographic Unit: County
Geographic Level: County (050)
Geographic Instance - State: Alabama
Geographic Instance - State: Alaska
Case Selection - Race/Ethnicity: No race/ethnicity iterations available (All races) (null)
Case Selection - Geographic Subarea: Total area (00)

Select the output data formats you would like to create.

Command File Formats:

- ASCII codebook file
- SPSS command file for column-delimited data
- SAS command file for column-delimited data
- Stata command and data files for column-delimited data (ZIP format)

Data Formats:

- Comma-Separated values file (best for Excel)
- GIS Comma-Separated Values file (best for GIS applications)
- Column-delimited data file
- Shapefiles for selected geographies

(Optional) Enter a description for this extract.
