County Business Patterns 2001

Using the Beyond 20/20 Browser with 2001 County Business Patterns

County Business Patterns is an annual series that provides subnational economic data by industry. The series is useful for studying the economic activity of small areas; analyzing economic changes over time; and as a benchmark for statistical series, surveys, and databases between economic censuses. The series serves various business uses such as analyzing market potential, measuring the effectiveness of sales and advertising programs, setting sales quotas, and developing budgets. The data are also used by government agencies for administration and planning.

Most of the nation's economic activity is covered in this series. Data are excluded for self-employed individuals, employees of private households, railroad employees, agricultural production employees, and most government employees. Beginning in 1998, data are tabulated by industry as defined in the North American Industry Classification System: United States, 1997 (NAICS).

To run the Beyond 20/20 Browser, you must have:

- Windows 95, Windows 98, or Windows NT
- Pentium-class processor recommended
- At least 16 MB of available RAM after all other system resources are loaded

Getting Started

The CD-ROM is designed to automatically display the 2001 *County Business Patterns* control panel when you insert the CD-ROM. If this does not start automatically, execute **Launch.exe** from the CD-ROM.

The 2001 *County Business Patterns* control panel has the following buttons:

- **Install Acrobat Reader** Software to View Publications
- **Publications** Publications Menu
- **Help** Technical Information

Summary statistics.

Universe Description

The universe is all business establishments with one or more paid employees. Most of the nation's economic activity is covered in this series. Data are not included for self-employed individuals, employees of private households, railroad employees, agricultural production employees, and most government employees. Beginning in 1998, data are tabulated by industry as defined in the North American Industry Classification System: United States, 1997 (NAICS). Data for 1997 and earlier years are based on the Standard Industrial Classification (SIC) System. For more information on the relationship between the two systems, see the "Bridge Between NAICS and SIC" at <http://www.census.gov/epcd/ec97brdg/> (internet connection required).

Subject-Matter Description

This file provides data on total number of establishments, mid-March employment, first quarter and annual payroll, and number of establishments by employment-size classes. Though data in County Business Patterns portable document format (pdf) files are not shown for NAICS with fewer than 100 employees in a given area, there is no such restriction on the data files. This series excludes governmental establishments except for wholesale liquor establishments (NAICS 4228), retail liquor stores (NAICS 44531), Federally-chartered savings institutions (NAICS 522120), Federally-chartered credit unions (NAICS 522130), and hospitals (NAICS 622).

Geographic Coverage

United States, 50 States, the District of Columbia, and counties. Data for Puerto Rico is released only in pdf format.

County Business Patterns 2001

Overview

County Business Patterns is an annual series that provides subnational economic data by industry. The series is useful for studying the economic activity of small areas; analyzing economic changes over time; and as a benchmark for statistical series, surveys, and databases between economic censuses. The series serves various business uses such as analyzing market potential, measuring the effectiveness of sales and advertising programs, setting sales quotas, and developing budgets. The data are also used by government agencies for administration and planning.

Most of the nation's economic activity is covered in this series. Data are excluded for self-employed individuals, employees of private households, railroad employees, agricultural production employees, and most government employees. Beginning in 1998, data are tabulated by industry as defined in the North American Industry Classification System: United States, 1997 (NAICS). Data for 1997 and earlier years are based on the Standard Industrial Classification (SIC) System. For more information on the relationship between the two systems, see the "Bridge Between NAICS and SIC" at <http://www.census.gov/epcd/ec97brdg/> (internet connection required).

This series has been produced annually since 1964 and at irregular intervals dating back to 1946. The comparability of data over time may be affected by definitional changes in establishments, activity status, and industrial classifications. For more details on these changes, see the section on Comparability With Other Data.

Sources of Data

County Business Patterns basic data items are extracted from the Business Register, a file of all known single and multiestablishment companies maintained and updated by the Bureau of the Census. The annual Company Organization Survey provides individual establishment data for multiestablishment companies. Data for single establishment companies are obtained from various Census Bureau programs, such as the Annual Survey of Manufactures and Current Business Surveys, as well as from administrative records of the Internal Revenue Service and the Social Security Administration.

Comparability With Other Data

Earlier County Business Patterns

The comparability of data with previous County Business Patterns series may be affected by the following definitional changes:

- the change from a "reporting unit" concept to establishment based data in 1974.
- the change in definition of "active" establishments in 1983.
- the change in industrial classification definitions, the most recent occurring in 1998.

Economic Censuses

In comparing the employment and payroll shown in this series with economic censuses data, the user should bear in mind that definitional and coverage differences may affect the direct comparison of data items. The definitions are detailed in the documentation of the various products. The economic censuses present data reported for individual establishments; whereas, County Business Patterns are based primarily on administrative records and data reported from current surveys. While every effort is made to resolve significant differences for the same establishment, differences are known to exist.

Data Withheld

In accordance with U.S. Code, Title 13, Section 9, no data are shown that would disclose the operations of an individual employer. However, the number of establishments in an industry classification and the distribution of these establishments by employment-size class are not considered to be disclosures, and so this information may be released even though other information is withheld.

Reliability of Data

All data are tabulated from universe files and are not subject to sampling errors. However, the data are subject to nonsampling errors. Nonsampling errors can be attributed to many sources: inability to identify all cases in the universe; definition and classification difficulties; differences in interpretation of questions; errors in recording or coding the data obtained; errors of collection, response, and coverage; and estimation of employers who reported too late to be included in the tabulations and for records with missing or misreported data.

The accuracy of the data is determined by the joint effects of the various nonsampling errors. No direct measurement of these effects has been obtained; however, precautionary steps were taken in all phases of collection, processing, and tabulation to minimize the effects of nonsampling errors.

Glossary of Data Items

Establishments

An establishment is a single physical location at which business is conducted or services or industrial operations are performed. It is not necessarily identical with a company or enterprise, which may consist of one or more establishments. When two or more activities are carried on at a single location under a single ownership, all activities generally are grouped together as a single establishment. The entire establishment is classified on the basis of its major activity and all data are included in that classification.

Establishment-size designations are determined by paid employment in the mid-March pay period. The size group "1 to 4" includes establishments that did not report any paid employees in the mid-March pay period but paid wages to at least one employee at some time during the year. Establishment counts represent the number of locations with paid employees any time during the year. This series excludes governmental establishments except for wholesale liquor establishments (NAICS 4228), retail liquor stores (NAICS 44531), Federally-chartered savings institutions (NAICS 522120), Federally-chartered credit unions (NAICS 522130), and hospitals (NAICS 622).

Payroll

Total payroll includes all forms of compensation, such as salaries, wages, reported tips, commissions, bonuses, vacation allowances, sick-leave pay, employee contributions to qualified pension plans, and the value of taxable fringe benefits. For corporations, it includes amounts paid to officers and executives; for unincorporated businesses, it does not include profit or other compensation of proprietors or partners. Payroll is reported before deductions for Social Security, income tax, insurance, union dues, etc. First-quarter payroll consists of payroll during the January-to-March quarter.

Mid-March Employment

Paid employment consists of full- and part-time employees, including salaried officers and executives of corporations, who are on the payroll in the pay period including March 12. Included are employees on paid sick leave, holidays, and vacations; not included are proprietors and partners of unincorporated businesses.

Industry and Geography Classifications

The quinquennial economic censuses are the primary source for industry and geography classifications. The annual Company Organization Survey, Annual Survey of Manufactures, Current Business Surveys, and other Census Bureau programs provide regular updates.

Industry Classification

Additional sources for assigning industry classifications are the Social Security Administration, the Internal Revenue Service, and the Bureau of Labor Statistics. These sources provide industry classification information for new businesses and businesses not canvassed in the Census Bureau programs. Establishments without sufficient industry information are tabulated in the "unclassified establishments" group.

Geography Classification

Most county codes are derived from the physical location address reported in Census Bureau programs. Those employers without a fixed location or with an unknown county are included under a "Unclassified" category indicated by county code of 999.

County Data Record Layout

The base county data file is in text format (comma delimited). The filename is CBP01CO.TXT. Because the CBP01CO.TXT file is large (a little over 150 MB), it has been compressed into a self-extracting file (CBP01CO.EXE) to save space. If you wish to access the base text file, simply copy the CBP01CO.EXE file to your hard disk and double-click on it in Windows Explorer to extract the CBP01CO.TXT file.

NOTE: "EMPFLAG" (Data Suppression Flag) field denotes employment size class for data withheld to avoid disclosure (confidentiality). Employment and payroll data are replaced by zeroes.

US Data Record Layout

The base U.S. data file is in text format (comma delimited). The US data is in file CBP01US.TXT.

The CBP01US.TXT file (about 1 MB) has been compressed into a self-extracting file (CBP01US.EXE) to save space. If you wish to access the base text file, simply copy the CBP01US.EXE file to your hard disk and double-click on it in Windows Explorer to extract the CBP01US.TXT file.

NOTE: "EMPFLAG" (Data Suppression Flag - Totals) denotes employment size class for data withheld to avoid disclosure (confidentiality). Employment and payroll data are replaced by zeroes.

Each employment-size class also has a 1-character data suppression flag (e.g. "F1_4"). A "D" in these fields denotes employment and payroll data are withheld to avoid disclosure. These data are replaced by zeroes.
