NOTE: The City of Milwaukee was not divided into census tracts until the middle 30's, and therefore 1940 is the first census for which census tract data are available(20's and 30's tracts are based on 1940's tracts). In order to facilitate analysis of population changes by census tracts, the 1920 and 1930 population of each census tracts was estimated using population of enumeration districts for these census years.
